You like travelling and are confident in english?
You like to discover new things and get new challenges every weeks?

Yes? Yes? Yes? ... so WELCOME!

Get a permanent job at Black Hole Lab

What will you do at BlackHole Lab SAS?

BlackHole Lab has been created to provide turnkey soft lithography stations to research laboratories. You will join the BlackHole Lab team to ensure the business development of our microfabrication brand worldwide. You will be in charge of the commercialization and of the marketing of our microfabrication brand as well as the installation all over the world.

You will be also welcome to participate to the R&D activities to develop the next brands and outside of those tasks, since we remain a small and moving company your job can spread out of this scope depending of needs and opportunities, such as supervision of European R&D project, finance, strategic discussion around a beer...

Your job will mainly consist in:

- Prospection & sales of our softlithography station to research lab
- Improve our scientific marketing to extend our business opportunities
- Installation of our soft lithography station worldwide
- R&D to improve soft lithography station or new station regarding market's need

You will work in direct relation with the CEO to define which projects are interesting from a strategically point of view and at the same time you will be in direct relation with the market to sell our equipment.

Job Requirements:

- A Phd in "hard science" (physics, chemistry, biology)
- Knowledge in microfluidic and softlithography
- A strong ability for interactions with others
- A smart mind interest by everything
- Perfect English speaking

Salary: your salary will depend on your ability and success.
